Tom and Dave,

Over the past several days I spoke to PAD, McCabe and Pavlou about this site and informed them of both past and planned activities. PAD will be assigning a CIC, Press Officer and a person to coordinate with elected officials (including the Congressman). I advised everyone that it was highly likely that we will be performing sub-slab sampling which would require a bit of coordination. Mentioned that access agreements would have to be drafted, some type of fact sheet prepared and so on..... Everyone is aware of the potential the site has. I told everyone that we are awaiting data from recent sampling activities and that we should have some numbers at the end of next week.

What I would like done while I'm in NO is to have a summary sheet prepared that gives the site background, how we got the site, when we got the site, how it was rediscovered, summary of the sampling results we have to date, the years that the dry cleaner operated, existing and future tenants that occupy or will occupy the renovated areas, that was previously the commercial dry cleaning facility and a summary of what sampling activities we are proposing. I would expect that we will be having a conference call within the next week or so to bring everyone up to speed on the specifics about the site.

Feel free to call me on my cell phone if you have any questions about this request.

Thanks,

Joe
